## **Pacific Alliance Technologies, a member of StarDyne Technologies, and Solution Q form Reseller Partnership**

**December 16<sup>th</sup>, 2009** – Pacific Alliance Technologies, a member of the StarDyne Group of companies, a leading provider of GIS, web-based mapping, architectural and building design software and services is pleased to announce an agreement with Solution Q to resell their industry leading Eclipse Project Portfolio Management (PPM) software. Under the agreement, Pacific Alliance Technologies will add the Eclipse PPM solution to their extensive software and service offerings to the Municipal Government sector.

Implemented in over 150 organizations across North America, Eclipse is rapidly becoming a tool of choice in the municipal government sector. Eclipse combines powerful project, portfolio and resource management capabilities with a common sense approach that stresses ease of use, implementation and support.

Craig MacInnis, VP Business Development with Solution Q identified that, “Pacific Alliance has a reputation for understanding and working with the municipal sector. The partnership with Pacific Alliance Technologies will allow for a broader implementation of the Eclipse PPM solution in the municipal sector as we leverage their expertise and service strength across North America.”

Ron Begg, Chief Operating Officer of StarDyne Technologies’ Government Solutions Division said, “Eclipse is an exciting addition to our family in the Government Solutions Division. Eclipse is an excellent Portfolio Project Management tool, and our position and peer networking in the local government market adds value to what our clients can get out of this technology.”

### **About Pacific Alliance Technologies**
