## **WorkTech Inc. Names Wanito Bernadin General Manager**

Grimsby, Ontario, June 1, 2010, WorkTech Inc., a subsidiary of StarDyne Technologies Inc. and provider of advanced work, asset and service management software, today announced the promotion of Wanito Bernadin to General Manager. In this role he will have primary responsibility for achieving the corporate Triple Bottom Line (Employee, Customer and Financial satisfaction) in a manner consistent with the long-term growth plans of the company.

To further align the organization for sustained success, David Munford, Founder and current President of WorkTech Inc. will assume the position of Director of Research and Development, Partner. This transition will enable him to focus on managing the execution of the company's future product strategy while capitalizing on emerging technology trends. "Wanito has been a key part of WorkTech Inc.'s success and we are thrilled to promote him to this important leadership position" said Ron Begg, COO Government Solutions Division, StarDyne Technologies Inc.

Mr. Bernadin joined WorkTech Inc. in 2003 as Sales and Marketing Manager and quickly made a significant impact both on the company's market share and strategic business partnerships. His widespread experience in solution selling, systems implementation and business consulting equip him to continue building upon the solid foundation established by David Munford since the company's inception in 1997.

In this new capacity Wanito Bernadin will report directly to the COO of the Government Solutions Division of StarDyne Technologies Inc. and will assume overall management of all WorkTech Inc. operating departments: Research and Development, Professional Services, Sales and Customer Support.
