

The Township of Woolwich Partners with AECOM and WorkTech Inc. to Consolidated Asset Needs and Leverage Existing GIS Investments

May 25, 2010, Canada, Ontario, Grimsby – The Township of Woolwich, Elmira, Ontario has chosen WorkTech Inc to implement Asset Management Software compatible with the Township's existing ESRI ArcGIS software. WorkTech's Asset Manager Foundation was recommended by AECOM to meet the Township's RFP requirements and was chosen because of its capability of maintaining the Township's Road Network Mapping, Database, Queries, Performance Prediction, Identification of Needs, Prioritization, Budgeting, and future coordination to other assets such as underground infrastructure.

The Township of Woolwich had adopted a proactive approach to asset management and needed a software solution capable of supporting a 10 year road construction and maintenance program based on criteria such as the pavement / surface condition rating, preventative maintenance, traffic volumes, school bus routes and construction costs. Additionally, the Township needed a scalable, modular based solution that could include future integration with other departments in an effort to consolidate information and promote collaborative planning.

Through the use of WorkTech's GIS Connector and Integration Manager Extender, the Township will be capable of a dynamic web based integration that will combine WorkTech's robust querying and database management tools found in Asset Manager Foundation with the Township's existing GIS mapping investments.

About WorkTech Inc

WorkTech Inc. develops, supports and deploys robust work, asset and service management software applications for the public sector. Equipped with thorough technological and vertical market knowledge WorkTech Inc. delivers advanced solutions in the areas of infrastructure maintenance planning and execution, job and project costing, and financial systems interfaces.

WorkTech Inc. is a member of the StarDyne Technologies Group of Companies. For more information, please visit www.worktech.ca

About the Township of Woolwich

The Township of Woolwich is a thriving community situated in south-western Ontario, in the northeast section of the Region of Waterloo. Engineering, as a section of Engineering and Planning Services, manages the implementation and inspection of work for the Township's infrastructures - roads, sidewalks, water, sanitary and storm sewers network for new development and capital projects. The department also includes public work operations that deal with the maintenance of the existing infrastructure of the Township and day-to-day activities of public service.
